

Earth friendly concrete technology
- no radioactive waste to children

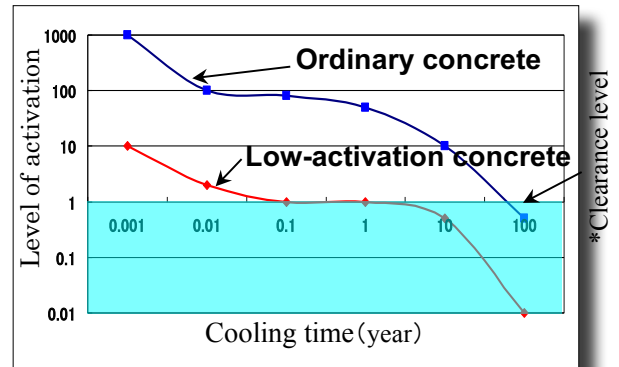

At construction

At decommission

Outline of low-activation

* Clearance Level : defined by IAEA and regulated at 2005 for reactor and 2010 for accelerator

Higher performance for strength and durability comparing normal concrete

Examples of application

- Inside wall of Accelerator facilities for medial or medicine
- Inside wall of transporter for used nuclear reactor fuel
- Shielding wall for measurement detector in J-PARC
