

## Achievement in this technical center

Rainwater on the roof has been effectively utilized

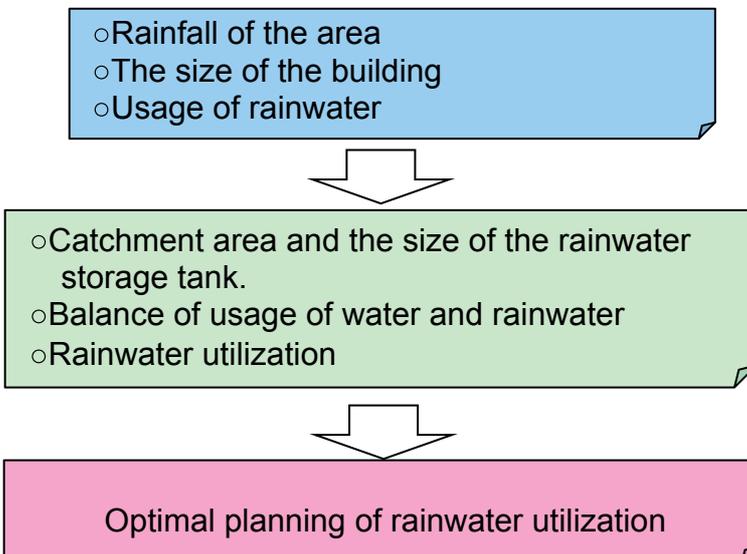

### 【Achievement】

- Use about 5,000m<sup>3</sup> of rainwater per year
- 73% of the total water use is rainwater
- Reduce the CO<sub>2</sub> emission by 1.8t per year

## Use and support system for rainwater utilization

Optimal planning for Rainwater utilization system

case study for rainwater utilization(m<sup>3</sup>)

	case1	case2	case3	case4	case5
Rainwater storage tank capacity	10	20	30	40	50
Amount of rainwater utilization per year	433	543	577	587	597
Rainwater catchment volume year	632	632	632	632	632
